Title: Method for the production of naphthalic acid imide derivative

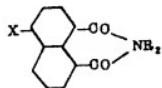

[Claim] (single claim)

A method for the production of a naphthalic acid imide derivative

represented by the general formula:

(wherein R<sub>1</sub> is an aralkyl group with a substituted part or allyl or aralkyl group with or without a substituted part and R<sub>2</sub> is a hydrogen atom or alkyl, allyl, aralkyl or cycloalkyl group with or without a substituted part), characterized by condensing a compound represented by the general formula:

(wherein X is a sulfonic acid group or a group of sulfonic acid salt, or nitro group, or halogen atom; R<sub>2</sub> has the definition given above) with a compound represented by the general formula:

R<sub>1</sub>-OH

(wherein R<sub>1</sub> has the definition given above) or a salt thereof in the presence  
of a condensing agent.
